

STACK AJACK™ HICHAIR KIT

Model No. SJ100-120/CCHCK1

Assembly instructions

Part 1: Taking apart your Clevercrib **Part 2:** Putting together your Hichair

Introduction

Congratulations on becoming the owner of a Stackajack Hichair kit. Make sure you register your product at www.stackajack.com for a chance to win some other great Stackajack products. You will also find all the information you need about the Stackajack product range, how-to videos and our contact details should you wish to get in touch

Product information

This box contains all the parts you need to put your Stackajack Hichair together, when combined with the legs of the Stackajack Clevercrib (sold separately). You won't need any tools. It's quick and easy to assemble. Please check that you have all the parts you need before you start (see "what's in the box" page). See the assembly instructions or watch the instructional videos on our website for more details.

The Stackajack Hichair is suitable for a child who can sit upright unaided (approximately 6 months) up to about 24 months. It has a crotch restraint and connection points for a standard safety harness, which you are advised to use.

A harness is not included but can be purchased separately.

The Hichair Kit includes a removable tray, so the Hichair can be used as a standalone or at the family table. It also makes it easy to clean. When your child outgrows the Hichair you can take it apart and use the legs with the other Clevercrib parts to make a table and two chairs – which are suitable for children aged 1 to 5 years.

Care and maintenance

Clean with mild soap and water, rinse well and dry. Do not immerse in water. Spills should be cleaned immediately. Do not use bleach acids or solvents. Colours may change if they are exposed to the sun. Timber is a natural material and can swell and contract depending on hot or cold conditions. If you find over time that your Hichair becomes difficult to assemble, apply some natural beeswax or similar to the areas to ease assembly. The nature of handmade, timber products is that there may be slight variations in the product.

Materials and Safety

Made of Birch plywood and meets FSC standards for responsible forestry.

Meets European formaldehyde emission standards.

Tested and complies with British and European safety standards;

BS N 14988-1:2006 + A1:2012
BS EN 71-3:2013

Other products in the Stackajack Range

This Hichair Kit is a conversion kit for use with the Stackajack Clevercrib. Visit www.stackajack.com to see other great Stackajack products and lot's more to come in the future.

We recommend;

Stackajack Handholders. These handy clip-on accessories can be attached to the Clevercrib, the table and the Hichair to hold those bits and pieces that you want to keep tidy yet close to hand.

Stackajack seat pads. You can customise your Hichair and table and chairs. Add some colour and comfort!

Warning

Important please read carefully before use and retain for future reference.

Warning – Important please read before use

A child who cannot sit up unaided should not use the Hichair.

Warning: Do not leave your child unattended.

Warning: Do not use the Hichair unless all components are correctly fitted and adjusted.

Warning: Keep away from open fires and other sources of strong heat, such as electric bar fires, gas fires etc.

Warning: When using a harness, make sure that it is correctly fitted as per the assembly instructions.

Only a competent adult should carry out the assembly of the Hichair.

Keep children away from the product during assembly to avoid the possible risk of injury.

Do not use if any part is broken, torn or missing.

Regularly check all fastenings or fixings to ensure that they are properly tightened or secured. Pay special attention to the Stackajack lock, making sure it is correctly inserted.

Ensure that all assembly fittings are tightened properly and take care that no parts are loose, because a child could trap parts of the body or clothing (e.g. strings, necklaces, ribbons for babies' dummies, etc.), which could pose a risk of strangulation.

Use indoors only.

Place the Hichair on a horizontal floor.

Do not allow young children to play unsupervised in the vicinity of the Hichair.

Attach the tray to the Hichair when in use, unless used at a dining table in close proximity to a supervising adult.

Be aware that when used at a dining table it is possible for children to push their legs against the table and tilt the Hichair backwards.

Do not climb on the Hichair or use it as a step or stool.
